*What lies before us and what lies behind us
are small matters compared to
what lies within us.
And when we bring what is within
out into the world,
miracles happens.*

Henry David Thoreau

Who am I? Why am I here? Where am I going? I'm sure most of us have asked ourselves some of those same questions without really finding any answers. Why is life? Many of us may find it hard to believe that we have come here with a purpose as we go about our busy lives sometimes it reaches out to us, sending us messages through our dreams, intuitions, and innermost longings. The call of our destiny manifests as our deepest drive and abilities that hidden force behind our personality. These drives can shape our careers, our relationships, and influence the quality and direction of our life. There may be things in our lives that at the time, we may question or wonder why and only until we go through them do we understand hidden force behind them.

Earth is our classroom and in order for us to advance spiritually, we must evolve to the point where each situation or what ever comes our way is greeted with love/compassion/gratitude/joy and without any degree of fear/anger/self-pity or any negativity. We have to awaken to who we truly are and to realize that, one creates their own reality through their own power of choice.

However, until we recognize that we have come here with a purpose, our life may feel like a puzzle with missing pieces, we may have a sense that there's "something" but we can't quite grasp what it is it. We will still have our share of pleasures and difficulties, but the fundament recognition of our life purpose may still be buried deep inside us.

We are all meant for greatness the path of life holds many wonderful and surprising adventures at times may seem clear and direct and then turn sharply in a surprising direction. At certain points on our journey, the road forks and we make choices that will change the rest of our life as what was true for the morning of our life has change by the afternoon of our life. Each path has its own challenges, each challenge contains a lesson, and each lesson leads toward enlightenment which is our life's fulfillment.

At the moment of birth, we all have our own inner mountain to climb and the time we take are up to us, as there is no need to hurry we always have the power of choice, discipline, responsibility, and commitment. No life path is harder or easier, better, or worse, than any other, expect to the degree we make it so. We have the power within us to create our own miracles for when we are inspired by any great purpose it expands our awareness for we realize that we are by far a greater person than we ever imagined ourselves to be and it is through this awareness that we bring out our greatness from within. Finally, I believe we coming to a new age of awakening people are starting to seek answers into the mystery of life and it is through the progress of self-realization that one connects with their higher self in realizing the miracle they truly are.

*Picture a horn of plenty,
Filled with an abundance of colorful fruit, gems and gold,
ready to share its blessing with all those
who stand forth and make the journey.
How do you feel about such abundance?
How might you stand forth in the world?
Might that of plenty already exist within you?*

The real measure of our wealth
is our worth if we lost our money

26/8

Those that are on the 26/8 life path are here to work through issues of balance, power, acceptance and vision in sharing with others their abundance from within
The 26/8 has high standards for themselves and they will work hard to achieve excellences in everything they decide to do. When 26/8s do get recognized it is usually for their work. Because they believe in nothing but excellences in everything, they do. This can sometimes cause some inner conflicts because the 26/8 really never believe that it is good enough and have to learn to tell themselves that it is good enough just the way it is. This can sometimes hold them back from stepping forward in life, because of their self worth and they have to be careful not to compare themselves with others in thinking that they have less.

Diplomacy and kindness are very important to the 26/8. Always wanting to say and do the right things and sometimes they can give their talents away for free to avoid the risk

of upsetting people. This is because the 26/8 can be very sensitive to criticism from others and would rather give it away than to be hurt by others opinions. Since our life, purpose is not always easy, how we handle the challenges along the way can make all the difference in keeping a positive attitude no matter what our life situation maybe.

With their high standards and perfectionism, the 26/8 can have trouble in enjoying their fruits of their labor. They can get caught up in working in rising above the world at large in achieving the security and recognition in mastering themselves that they forget to stop and take some time for themselves.

The 26/8 loves a good challenge if it is too easy they find it boring and unfulfilling without challenges they will avoid the hard work and success in do things just enough to get by. In taking up a good challenge, they can become a powerful force. The climb to the top may be a hard and slow until they master themselves in achieving success.

The 26/8 with their high vision has no problem in making good money it does not matter what they do money seem to flow into their life. When they focus on the their higher purpose in maintaining fairness, inner balance, in giving of themselves in positive ways they can be a power house to those around them by helping others it open the way to a life of abundance whether it's power, money, or happiness in giving of yourselves we shall receive.

Life Path 8

We all come here with your own unique chart and we are all come here to learn and progress through life. The lessons that we have brought with us in this life are to shape, and form the personality of the “self.” The 8 is about power, management, and drive.

People that are on this path should have no problems with their use of power on the material plane, as your abilities in management, leadership, and stamina are excellent inner qualities. You have good judgment and know when not to let a good opportunity slip through your fingers.

The eights mission in life is learning to put the proper value on their material things in that there are just as many rewards in life on the spiritual level.

They have no problem in tackling anything when they have their minds set and they do their best work when in a crisis as their leadership abilities are at their best.

Success in life will only come through our own efforts as we gain the knowledge and wisdom that we need to help us in fulfilling our life purpose. Respect and recognition are our rewards in mastering ourselves. Even then, success will only come when it is for the good of all and not the self. When we give of ourselves through kindness and understanding it open the door for us to receive the same.

The Whole Name 11

The Most important number is the whole Name Number. This number shows how the Birth number will be expressed. The 11 is about being a visionary and inspirational. It is your path to care for others in all forms. The Whole Name number 11 is a very hard to live up to. You must learn to lead the people with good grace and live up to high standards. You have to promote better ways of living for everyone. As you grow through life and learn, you will have the inner understanding of spiritual and physical needs. Most people reject the hardships of a master number until they are in their 40's and up by then they have the wisdom and understanding of life to make a difference for others.

The Whole Name Number 2

The Whole name Number 11 is also the number 2. Most people with the 11 vibration are more likely to accept the 2 for most of their younger years. The 2 is all about partnership and harmony among those who share your life and others as well. The 2's can teach others that by working together and co-operating that you can make a difference in the world. Partnership doesn't always mean just two it could be a group or a club. You are the type of person that enjoys working behind the scenes and you will be loved if not noticed for the effort you quietly put into everything you do. Try to look at life with detachment, or your rather emotional reaction to things may spoil your life. When helping others do not get personally involved or you may regret it. Just go on creating much-needed harmony everywhere you go.

*From the viewpoint of our separate self
And smaller will,
It's normal to act on the basis
Of our own desires and preferences;
When we surrender our smaller self and will
To the guidance of a higher will
And dedicate our actions
For the higher good of all concerned
We feel an inspired glow
At the center of our life.*

Thomas Merton

Master Number 11

The soul has chosen this life to come back to earth out of compassion for his fellow man. They represent an older soul that has come back to give his service in the highest form as they have experience life in all form and because of this have a understanding that is not

noticeable to the average person. They have a sense of peace about them an inner grace in that they have a deeply compassionate attitude about life.

The Master Number vibrates at a higher level and it can be a hard to maintain living at that level all the time as it can be very stressful and many find life easier to handle at a lower level the 2 vibration. However, the soul has not forgotten what it came here to do and when you are ready it will let you know what your mission for humanity is.

It is important that you stay true to your self even when thing seem to be at there worst. Our life situations do change and remember you have done everything before and have passed the grade already. When you believe in the power of the self, there is nothing that you can't handle and in time, you come to know that awareness within you. It is important to use your power of knowledge wisely for if used unwisely may result in the loss of their use and may result in destroying yourself as well.

You should listen to your intuitions or your inner voice when seeking truths or guidance as you have a direct link to the spiritual realms. Your inspirations and ideas come from far beyond earth plane, when you are inspired you are in-spirit and many will find it hard to comprehend, and you may have to put it in a form in which others can easily understand. It is important to show compassion and kindness to those less able than you are. These days there are so many people that are struggling in learning their lessons of life the hard way that greatest gift we can give someone is our wisdom of knowledge and that is why we came back to inspire and uplift the masses of the people in any form that we can get them to listen.

To show tolerance for those less fortunate is to forgive them for they do not know what they do meaning they are not in-spirit as they are unaware for the ego has all of their attention and it is hard for them to see beyond their physical form.

It is important to remember that we become what we think about and there are just a many rewards on the spiritual side of life. You were meant to be a visionary use your talent and gifts in helping others to bring to life their own dreams and they will fulfill yours.

The Soul

In Numerology, it is felt that human goes though a series of incarnation at the end of them all we will be ready to use all the knowledge that we gained in the service of the soul.

The soul is who we are on the inside, not what we want other to see on the outside. The soul is the energy of our essence or, more simply, our true self. This part of us exists outside of and apart from the body. It is this element of ourselves that we bring to our human experiences and at the same time reflects those experiences back into each new personality we take on. Through the many incarnation or life experiences, we have lived and how we've chosen to incorporate the lesson of those experiences may reflect the souls maturity. There are some who are farther along in their quest than others, those who have made more journeys will have more practice in their spiritual understanding and awareness.

The soul's individual character enables it to influence its physical environment to give greater harmony and balance to life. Souls are an expression of beauty, imagination and

creativity. So the Soul being this repository of our past experiences and being in a position to know the future can blend its total self into our present life via the soul vibration found in the vowel Number. The ancient Egyptians said that to begin to understand the soul, one must listen to the heart.

Vowel Number 10/1

The Vowel Number is the deep, inner divine or soul, bringing it own vibration to the personality. For Your spiritual growth, it's through the expression of individualization of self. You prefer to be free to be yourself, and to act on your own, for this is a strong character trait, you have brought with you from others lives. You are likely to want to look after any situation that arises. In time, you will begin to realize the possibilities of a higher consciousness rather than wanting sheer power over others.

It is your task to lead the way, many times where no person has gone before, be the first to try new things or new ways to do the old things. However, be wise in knowing when you need help and when you don't so that you don't over burden yourself.

Our higher self

Meditation Ray 1

When in meditation seek the guidance of your higher self by concentrating on one wish or desire at a time. Listen to your intuitions for they will guide you in the right direction. When you are tuned into this first ray, it raises our awareness and perception for our options becomes more clearer when we are relaxed and calm.

The Personality

The personality is what gives the soul the ability to express life within the physical realm of time and space. Without a manifest personality, the soul is unable to interact with the world. The soul incarnates into a body which has a personality which is formed by our genetic background and our home life.

The soul and the personality are not the same thing. We tend to think of the soul and the personality [or ego] as interchangeable. The personality is a reflection of the soul that animates it. When we are born, we take on the traits of our parent, we may take -up the same careers, hobbies and may even have the same likes and dislikes as our parents. But, we are not like our parents. Our soul reflects this as we have our own personality separate from our genetic make-up.

Each personality that the soul choose for growth, demonstrates where on the spiritual journey the Soul is or one could say reflects its level of spiritual maturity. It is important to recognize is that is it the soul that powers the personality. The two aspects work hand in hand to form a complete and total life experience be it positive or negative.

One may wonder what become of the personality upon death. Does the Soul move on discarding the personality or does it live on forever in someway, intact with its lifetime of experiences? There are many different theory and many religion have their own beliefs. However, I believe that the personality is like a CD the soul use it to record a lifetime of experiences and events. The CD is simply collecting the data that the soul will process and learn from throughout the course of each incarnation. Therefore, who you are in this life time is the data collect over the many lives you have lived.

There are many who believe that a “good” person in this life is a wise soul a “bad” person is a reflection of an immature soul that has only begun its adventure. I’m not to sure if that true, but we all make your own choices in life, the choices we make in life do affect the quality of how we live.

Consonant Number 10/1

The Consonant Number seems to hide the deep wishes, hopes, and desires that we all have. The One stands for leadership and independence when it comes to making their own way in life. Your secret wish is that you want to be cool, calm, and collected individual, to be able to handle everything and everyone with ease and poise. The 1s, like to be seen as a impeccable dresser and be thought of as some body who really knows what’s what and who’s who. It may take some hard work, but this wish could come true.

*Imagine a hidden spring
Flowing in depths unseen,
Carrying within its current secret,
ready to bust forth in abundance
nourishing, giving life,
for anyone willing to dig deeper,
How are you like that hidden spring?
What resources wait for you just beneath the surface?
What gifts might you find?
In what practical ways do you need to balance your life?
before your inner, sigh opens?*

*What we are is god's gift to us;
What we become is our gift to god.*

Inner Gifts

The primary numbers 1 through 9 describe the most fundamental arenas of destiny. The zero however does not involve a life purpose as such, but rather points to the inner gifts of a person or the potential resources. These resources tend to enhance the energies of the other numbers as well as signal refine or amplified qualities of strength, sensitivity, expressiveness and intuition. Because what we're here to do isn't necessarily what comes easiest, individual working zero may seem to have more sensitivity than other people, until they have progressed further up their inner mountain. Those who have these inner gifts may enjoy them, share them, misuse them, or ignore them depending upon their individual level. There are 4 inner gifts the 10, 20, 30, 40, and they are strength, sensitivity, expressiveness, intuition.

Inner gifts don't usually mature fully until individuals reach the age of thirty-five to forty-nine. They may arise earlier even suddenly in the face of a crisis or emergency, or they may develop slowly over the years. These gifts remain throughout a lifetime, but they only manifest to the degree individual working zero have cleared the life issues or obstacles that may block them. The higher the commitment to service, the more power fully these gifts manifest.

*I think one must finally
take one's life in one's arms.*

Karmic Debt 19

This debt has come about because of the miss use of power in your past lives and you have decided to pay it off in lifetime.

In the 19/10/1 it is the 1 for the self and the 9 is for everyone else. The [1] uses the power over everyone else [9] for selfish gains or reasons and you took advantage of the peoples trust. This is one of the hardest to try and balance in one life time as the 1 [self] is to rise above in order to reach completion the perfect 10 as $1+9=10$ which will test us.

Power in it self is a powerful vibration became it can effect so many people. Many leaders have used their power to put fear in to the people for their own gains. Since power can be used on a small or large scale it must be paid back the same way on the spiritual law meaning The Law of the Circle whatever we send out returns to the sender, what we sow is what we reap.

You may find many difficulties that will surface in this life that will bring clarity to the situations. There may have been times where it seems like a struggle in that you had to learn to be independent to learn to stand on our own to look after yourself and learning to think in a positive way which sometimes can be a hard thing to do.

The debt lessons may last the whole life time so it is important to have a positive attitude as you will need the strength namely to show leadership, independence and it must we done without domineering but for the good of all and not the self. This will not be easy, as you will run into souls that you have harmed in the past life they come here in this life as friends or family members. Until you learn how it works, you may have problems at home or at work in that, many stressful situations can be healed with a good sense of humor, as it is a very strong energy force

Your soul has chosen this vibration for you to repay this debt as quick as possible for the debts that are owed from previous lives. By being patient and tolerant with others, it teaches us brotherly love caring for other people. You will know when the debt is paid for you will have a feeling of accomplishment. And you will come to a new understanding in that you will receive more than you give when our power is used wisely for the good of all and not just the self.

In this life, you are here to learn the art of self-expression although there may be times where you may find it hard to do. You will have to learn to spread the joy of living to all that you meet. Keep an open attitude when with others or it may put them off- you may appear to be aggressive or insensitive of how others are responding to you. This lesson has come about because you found it hard to express yourself in your past lives, nor did you find any joy in living. Learn to overcome the fear of people by getting out more and socializing as it will help you overcome your shyness.

The Nine Year Cycle

*The power of the world always works in circles;
And everything tries to be round.*

*The sky is round, and I have heard
That the earth is like a ball;
And so are the stars,
The wind, in its greatest power, whirls;
Birds make their nest in circles,
For theirs is the same religion as ours
The sun and moon, both round
Come forth and go down again in a circle
Even the seasons form a great circle in their changing,
And always come back again to where they were
The life of a person is a circle from childhood to childhood,
And so it is in everything where power moves.*

Year 1 2010

This year is the beginning of a New Cycle of experiences. You should have put behind the past 9 years. Look forward to meeting new people, New Places. This is the year that will give you a fresh start. Your ambitions will become stronger be wise in planting the right seeds and it is important to keep a positive attitude.

Be yourself in every way, abiding by your decisions regardless of people or life situations. Hold on to your own ideals and purposes of being who you are, follow your own counsel. It is a powerful time of decision making, “sow” what you will expect to reap and don’t get lazy or lose sight of your goal, as each year has its own schedule for growth. Do not be frightened of trying out a few untested ideas. Develop new concepts in your thinking and widen your circle of friends and acquaintances.

Year 2 2011

This is the year that the seeds that you planted last year will begin to grow. But don’t expect to see any results yet. You must learn to be patient and calmly wait for things below the surface to grow. The seeds that you planted need the sun, and water to grow. In the second year, you need to work with others in some form to strengthen your relationships rather than doing things yourself. Keep an open mind about things and study all that you can on what interest you, as they will come to you if you are patient. It is important not to be overly-sensitive about things as they will work themselves out. New opportunities and privileges will drop into your lap if you don’t make too much effort to seek them.
